

Please do not rule against Wisconsin's outstanding "Do Not Call" law. This is an issue that should and must be decided at the state level, not the federal level. What a travesty it would be for a poor federal law to supercede an extremely well designed Wisconsin law. The Wisconsin law provides strong protection against a most unwelcome intrusion into my personal time. The FCC and the businesses seeking to overrule the Wisconsin law should understand the bad public relations this effort creates for the supporters. Any business or organization that values a favorable public image would not want the bad PR associated with this proposal.
